

### *Discussion Questions Week 7*

Is your church more of a grace church or a faith church? How might your church preserve its strength while shoring up its weakness?

Do the people attending your church expect to gather in the presence of the living God? How might we better honor the transcendence of God (while retaining his immanence) in our worship?

What percentage of the people attending your church's worship services sing along during the music portion? If there are some who do not sing, why do you think that is? What might a church's singing indicate about its health?
